ABOUT

High Performance Computing and Analytics are resource intensive. They demand powerful environments with dynamic allocation for maximum productivity. CB Technologies delivers premiere HPC and Analytics for today's most critical industries, propelling our customers' success by providing powerful, efficient solutions for the modern enterprise.

With over 15 years' experience designing unique and highly complex solutions for Fortune 50 companies, CB Technologies offers unparalleled depth and breadth of knowledge to deliver our customers' most pivotal business systems.

CAPABILITIES

Engineered HPC Solutions

- Efficient and cost effective
- Centralized workloads
- 1000+ node solutions
- VDI
- CPU/GPU options
- Turnkey to fully custom

Consulting/Services

- Benchmarking
- Optimization
- Transitions
- Configurations

WHY CBT?

- CB Technologies' world class engineers and innovators have unparalleled depth and breadth of knowledge
 - Gary Levins
 - 30+ years at Boeing
 - Former Chief HPC Design Systems Integrator
 - Jim Broom
 - 15+ years working HPC configurations for Fortune 50
- Agility of experienced systems integrator as opposed to large OEM
- Multitude of successful cutting-edge projects for Fortune 50/Gov.
- Unparalleled access to best-of-breed partners and technologies
